

TIBBALS LEARNING CENTER

The Tibbals Learning Center doubles the size of the existing Circus Museum and brings to life the extraordinary history of one of America's greatest institutions – the Circus.

The facility offers:

- The 3,800-square-foot *Howard Bros. Model Circus*, a replica of the American tented circus at its heyday
- Display of vintage circus posters
- Comprehensive exhibition on the history of the American circus
- Videos, interactive displays, and rare artifacts
- Functioning workshop for Howard Tibbals to work on his miniature circus

Logistics

- 30,600 square foot, 2-story building
- Building Budget: \$8,832,775
- Architect/Engineer: Harvard Jolly Architects, St. Petersburg; HOK Florida, Tampa location
- Construction Manager: Willis A. Smith, Construction, Inc.

Update

Since opening the Circus Museum's Tibbals Learning Center in January 2006, the facility has welcomed children of all ages through its doors. The feedback from visitors has been extremely positive and the resulting word-of-mouth has been a significant contributor to the growing rate of admissions.
