

FUN WITH CHALK

This week we are exploring chalk. Drawing with dry and wet chalk can produce very different results.

Need a larger working space? Take your chalk artwork to the street!

Materials:

Chalk, black paper, water, sponge or paintbrush, fingers optional

Directions:

◇ Paint with chalk by dipping chalk into water

OR

◇ Use a paintbrush or sponge to spread water all over the black paper

◇ Try combining both dry chalk and wet chalk. How are they different?

◇ You can also use a sponge or paintbrush to move colors on your black paper. This will also create different textures.
